Call for Project Posters

The Poster Session of the upcoming MARC Symposium (www.marc2012.de) will provide an interaction opportunity for researchers, developers and users to present and demonstrate their Many-core related research projects. The session will offer presenters an open platform for exchanging ideas and for obtaining feedback in an informal setting and it gives conference attendees a forum where they can learn about novel ongoing projects or where they can keep up with progress reports. Furthermore, this session will also provide an ideal location for PhD students to present their preliminary findings and to discuss them with the MARC community.

Since we want to make this session a colorful marketplace where different research fields should be covered, we decided to make the topics of interest of this Call for Posters likewise widespread: Welcome are all posters displaying Many-core related projects (large or small), updates on ongoing projects and work-in-progress, or just innovative ideas or observations not yet mature for a full paper.

Poster abstracts will be peer-reviewed by members of the Posters Committee based on relevance to the Many-core Applications Research Community. Poster authors are invited to submit Poster Title, Author List and a short Poster Abstract of about 100 words to the following email address until November the 9th: marc2012@lfbs.rwth-aachen.de
